## Experience

***Software Engineer***                                                                                      Jan. 2020 - Apr. 2020

Nisum Technologies, Fremont, CA
- Collaborated with a team of seven, using Git and Gitlab throughout the development workflow.
- Attended daily standup meetings to discuss progress and roadblocks of current projects.
- Improved site accessibility with a Lighthouse score of 98% by adding ARIA tags to various HTML elements and components such as image tags, tabs, and accordions.
- Refactored code base to use reusable templates and Sass variables for font sizes and colors.
- Developed **reusable, accessible, browser-friendly, and mobile responsive components** such as tabs, pagination, accordions, masonry grids, and content blocks.
- Utilized HTML5, CSS3, SCSS, jQuery, and Handlebars.js to build static pages of a production website, keeping modularity and reusability as key design principles throughout the development process.
- Dynamically rendered static data by serving JSON formatted data using Express routing, and using Handlebars' semantic templating to render data in static pages.
- Created unit tests of Vue components using Jest and Vue-Test-Utils, testing for user interface and functionality of individual components.

***Technical Admissions Specialist***                                                         Nov. 2019 - Jan. 2020

App Academy, San Francisco, CA
- Conducted technical and non-technical interviews of coding bootcamp applicants.
- Critically assessed algorithmic aptitude in JavaScript and Ruby.

***Outreach and Recruitment Manager***                                               Sep. 2018 - Jun 2019
